

Global Partners Institute

in partnership with

Park West School Division

Invite you to an informational evening about

CULTURE IN YOUR COMMUNITY

At Birtle Elementary School

On Thursday April 4th, 2013 at 7:00pm

Global Partners Institute has been placing international high school students from Japan & Australia in your community schools for the past 8 years. These students have enhanced the schools and communities of Park West by adding a little culture into small Manitoba towns and schools. They come with a spirit of adventure, the love of learning something new & desire to share about their corner of the world. These students love the small towns of Park West for the sense of community, small friendly schools and beautiful Canadian nature. For our host families these students bring another part of the world into their home. As they experience new foods prepared by the student, learn about their traditions and holidays, they become in many ways, arm chair travellers.

Global Partners and Park West Division would love to continue to bring culture into your communities, schools and homes. Come join us for coffee and a presentation on April 4th to learn more about our programs for host families, international exchange for Canadian students, and the wonderful educational benefits of learning more about the cultures of our world!

One World ~ One Family
