

Security

The buildings and grounds of the school division are one of the greatest investments of the community, and they should be adequately protected. The Principal shall be responsible for the security of the school.

"Security" means not only keeping buildings locked and secure but also providing protection from fire hazards and faulty equipment and safe use of electrical, plumbing and heating equipment. The Board requires and encourages close cooperation with local police, fire and insurance company inspectors.

Access to school buildings and grounds outside of regular school hours shall be limited to personnel whose work requires it and to sponsors of approved activities. An adequate key control system shall be established which will limit access to buildings to authorized personnel and will safeguard against entrance to buildings by persons unauthorized to have keys.

Prudence shall be used to safeguard funds and valuable records.

Each school building shall be inspected annually to address removal of hazards and evidence of vandalism and any other barriers to safety and supervision.

Alarm systems and other devices that protect buildings against illegal entry and vandalism shall be installed where appropriate.
