

COVID Notification - May 11, 2021

We just received notification that Hamiota Collegiate has a second member of the school community who has tested positive for COVID. Public Health has not yet contacted the school. However, the preliminary investigation suggests that the majority of potential close contacts from the school are already self-isolating. As a precaution, some bus students were asked to stay home tomorrow pending the investigation. If anything changes after consulting with Public Health, an update will be provided.

Along with the second positive case at Hamiota Collegiate, there is also a new positive case at Hamiota Elementary. The individual in question was not at school during the communicable period which suggests that no students or staff need to self-isolate. Again, we will await further direction from Public Health to confirm this.
