Topic: **COVID Notification – Major Pratt School**

Park West School Division has committed to sharing COVID information with staff, students, and parents in a timely fashion. This has been done through regular emailed updates as well as our biweekly evening meetings.

This week we had our very first situation involving a positive case in a school which required multiple individuals being sent home to quarantine. In all instances such as this we will share the information on our website and social media to inform our stakeholders.

On Sunday, March 21, Major Pratt School received a letter from Public Health noting at least one confirmed case of COVID-19 in the school on March 16-17, 2021 when the individual(s) may have been infectious. The school administration and the division are working closely with Public Health officials and are following their recommendations. Close contacts have been identified and advised to self-isolate along with their household members.
