

Pre-School and Child Care Programs

Park West School Division supports learning opportunities for pre-school children in both nursery and child care programs, and will, whenever a school's circumstances permit, provide space to a community group or individual for the purpose of offering a pre-school program(s) within a community.

The preschool program must be designed for the purpose of fostering the development of young children's intellectual, social, emotional and psychomotor skills. The childcare program must operate in a manner that is consistent with provincial licensing requirements. Appropriately planned and supervised activities will be conducted to meet the developmental needs of the various age groups served.

The school division is authorized to charge fees for use of its facilities and rental fees to cover utilities and cleaning may be charged. Where facilities have been constructed by agreement with the Province of Manitoba, charges shall be as determined at the time of entering into the agreement, subject to revisions for change of use, changing circumstances, and/or increase in costs.
